CURRICULUM VITAE

ABOUT ME
A great building must begin with the immeasurable, must go through measurable means when it is being designed, and in the end must be unmeasured.
- Louis Kahn

parking
swimming pool yoga platform
outdoor gazebo Many species of
trees
vegetable garden

BUNGALOW

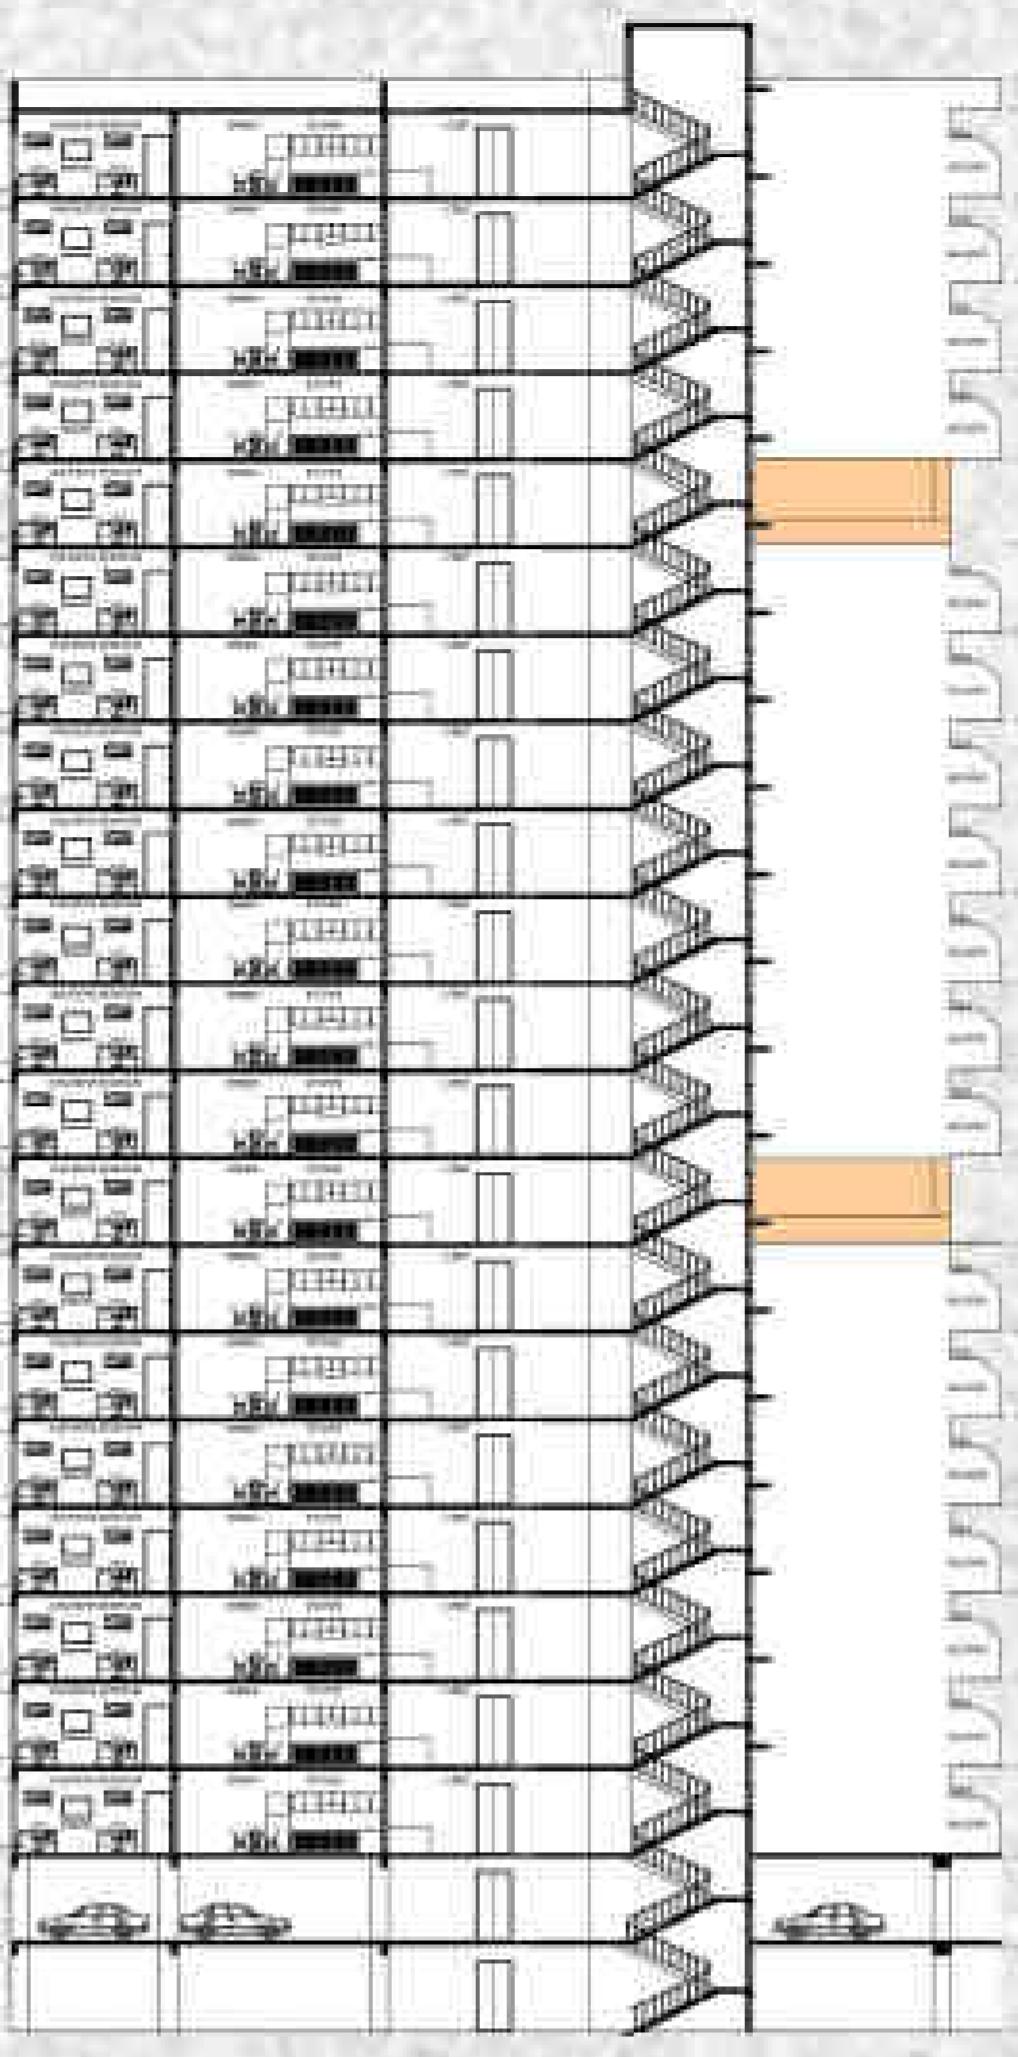

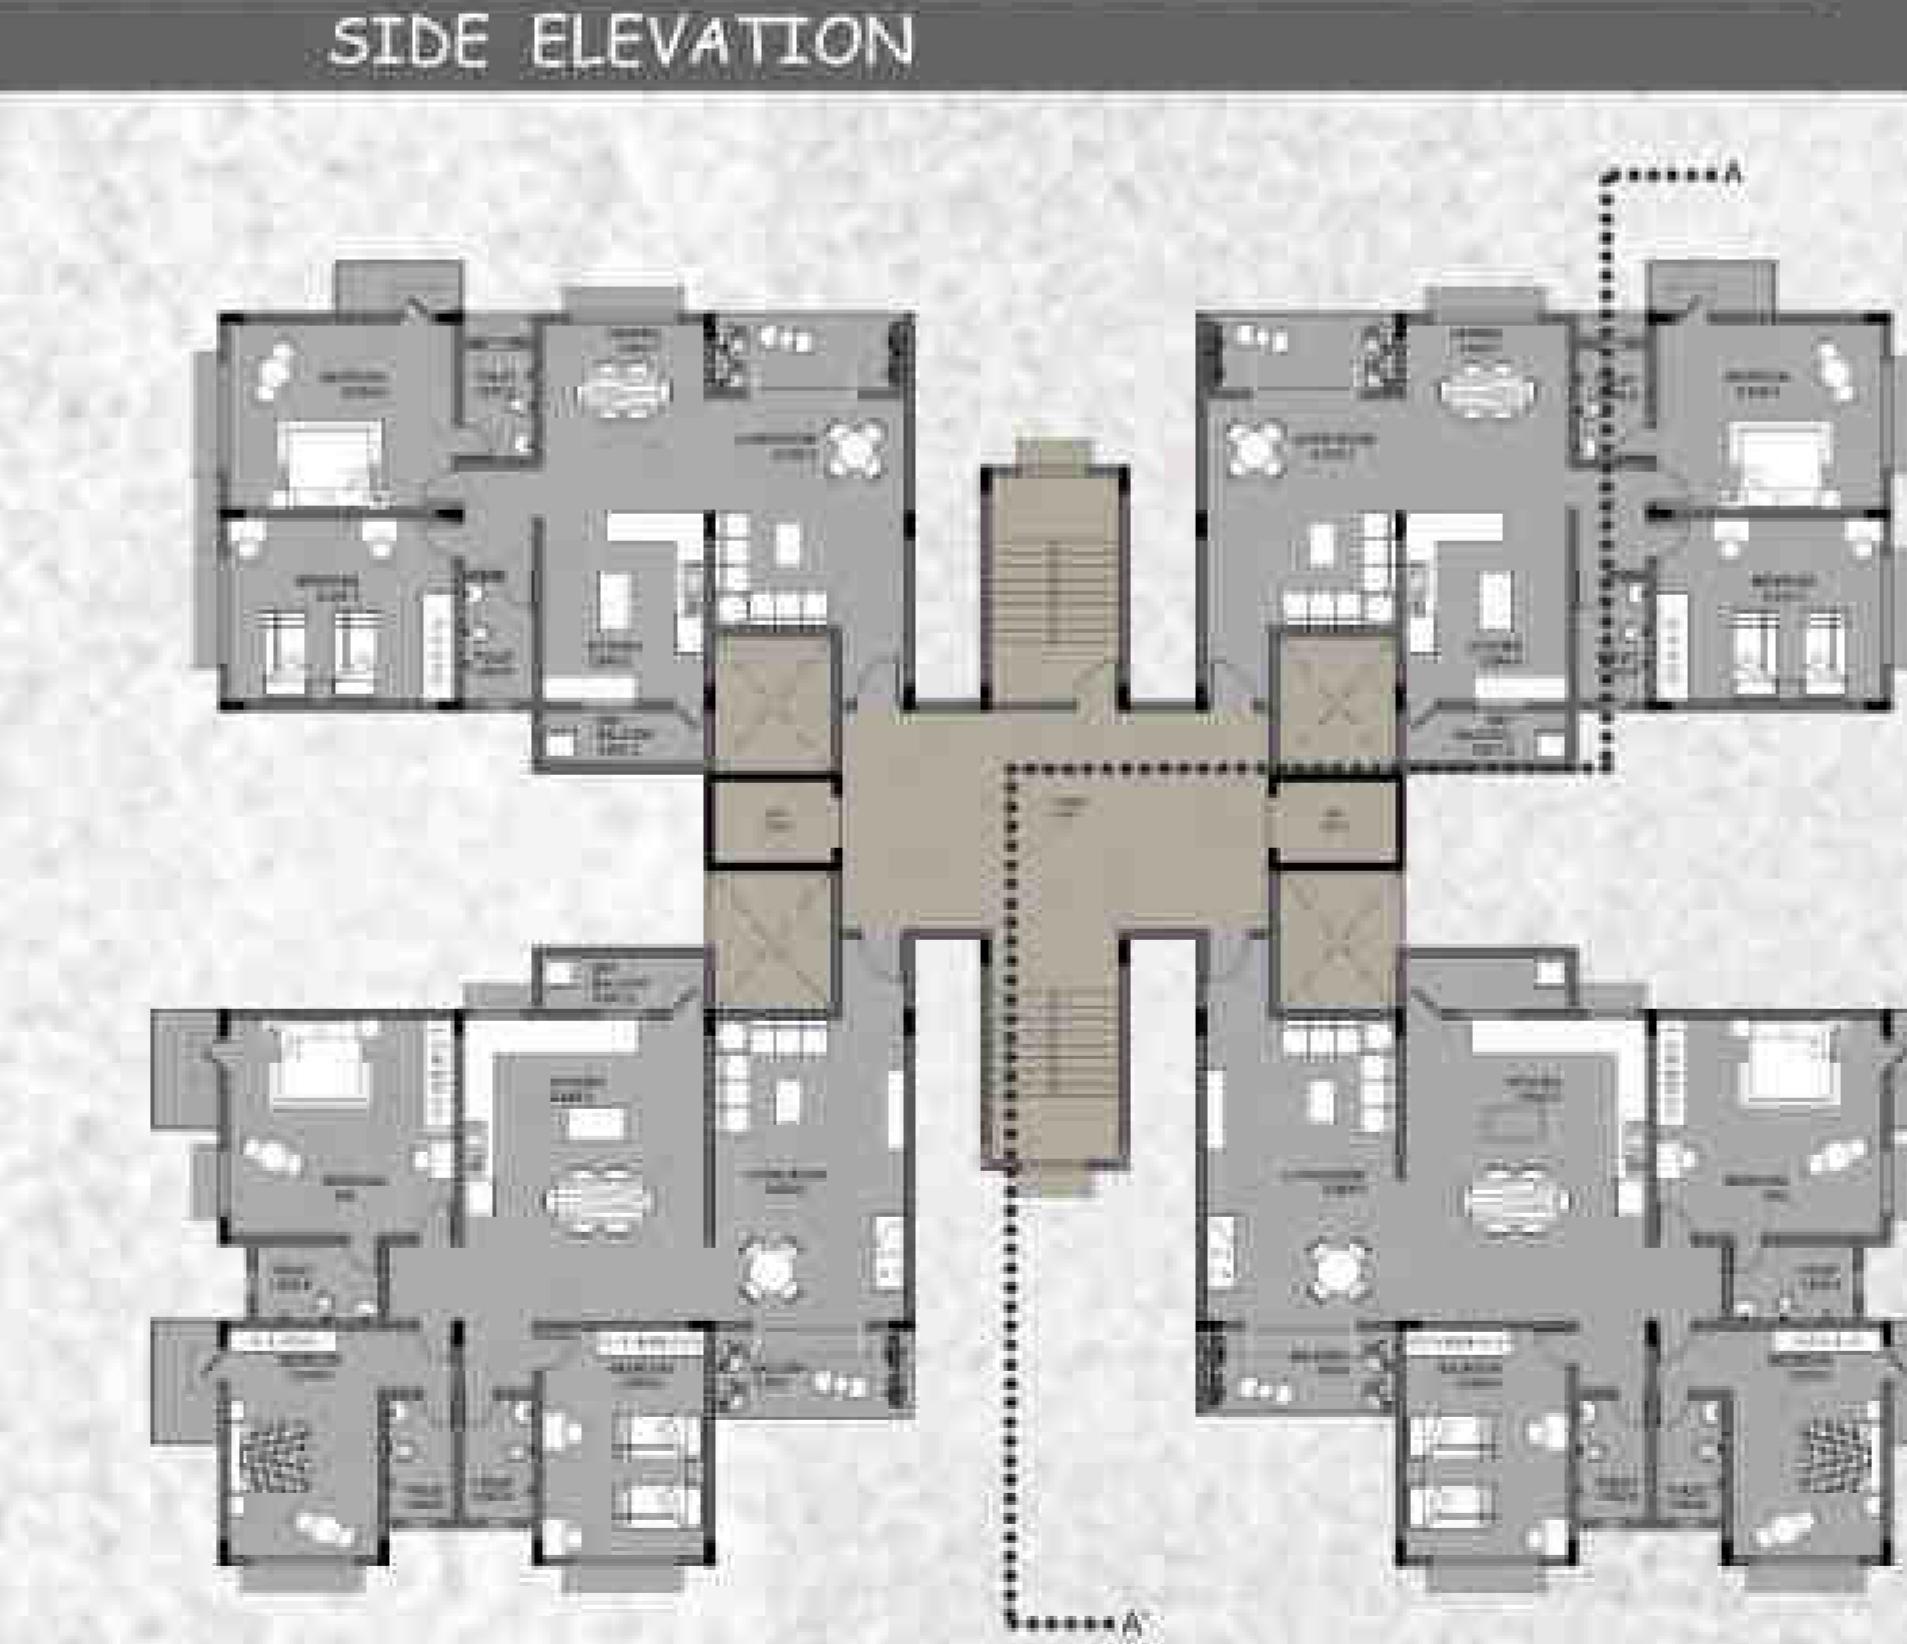

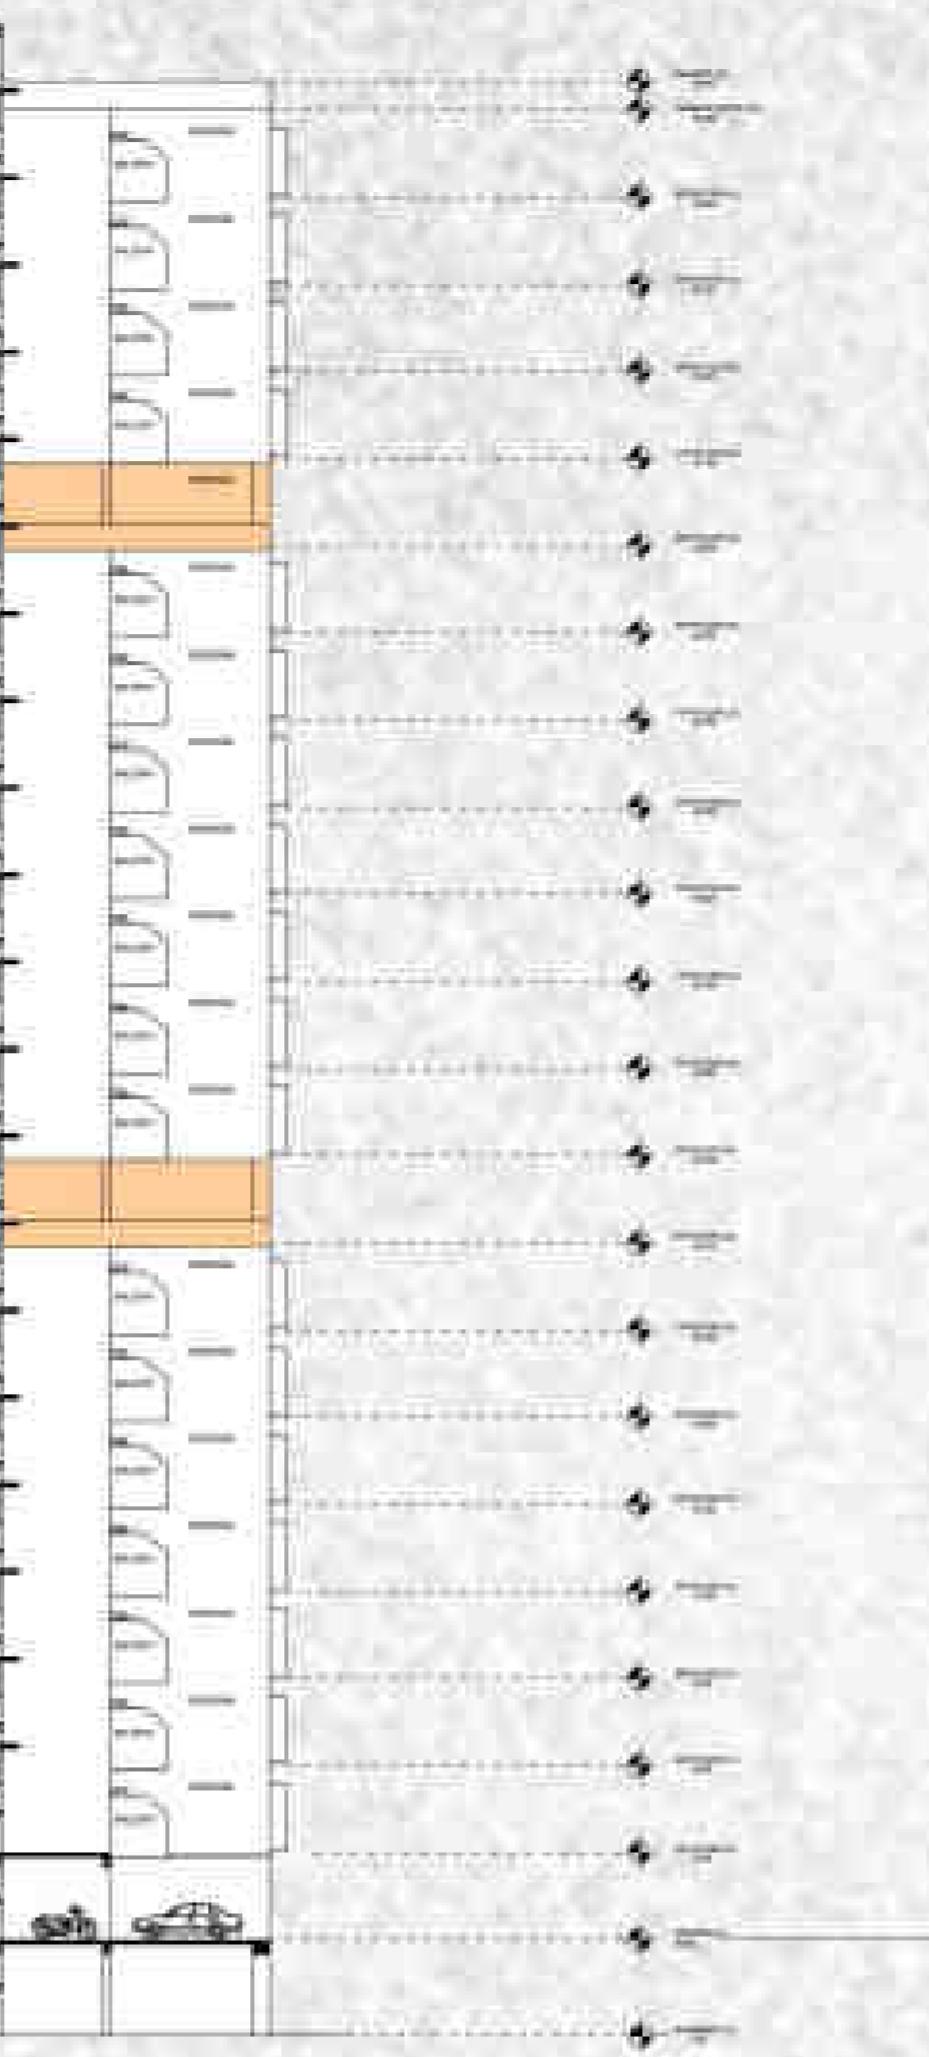

LUXURY HOUSING

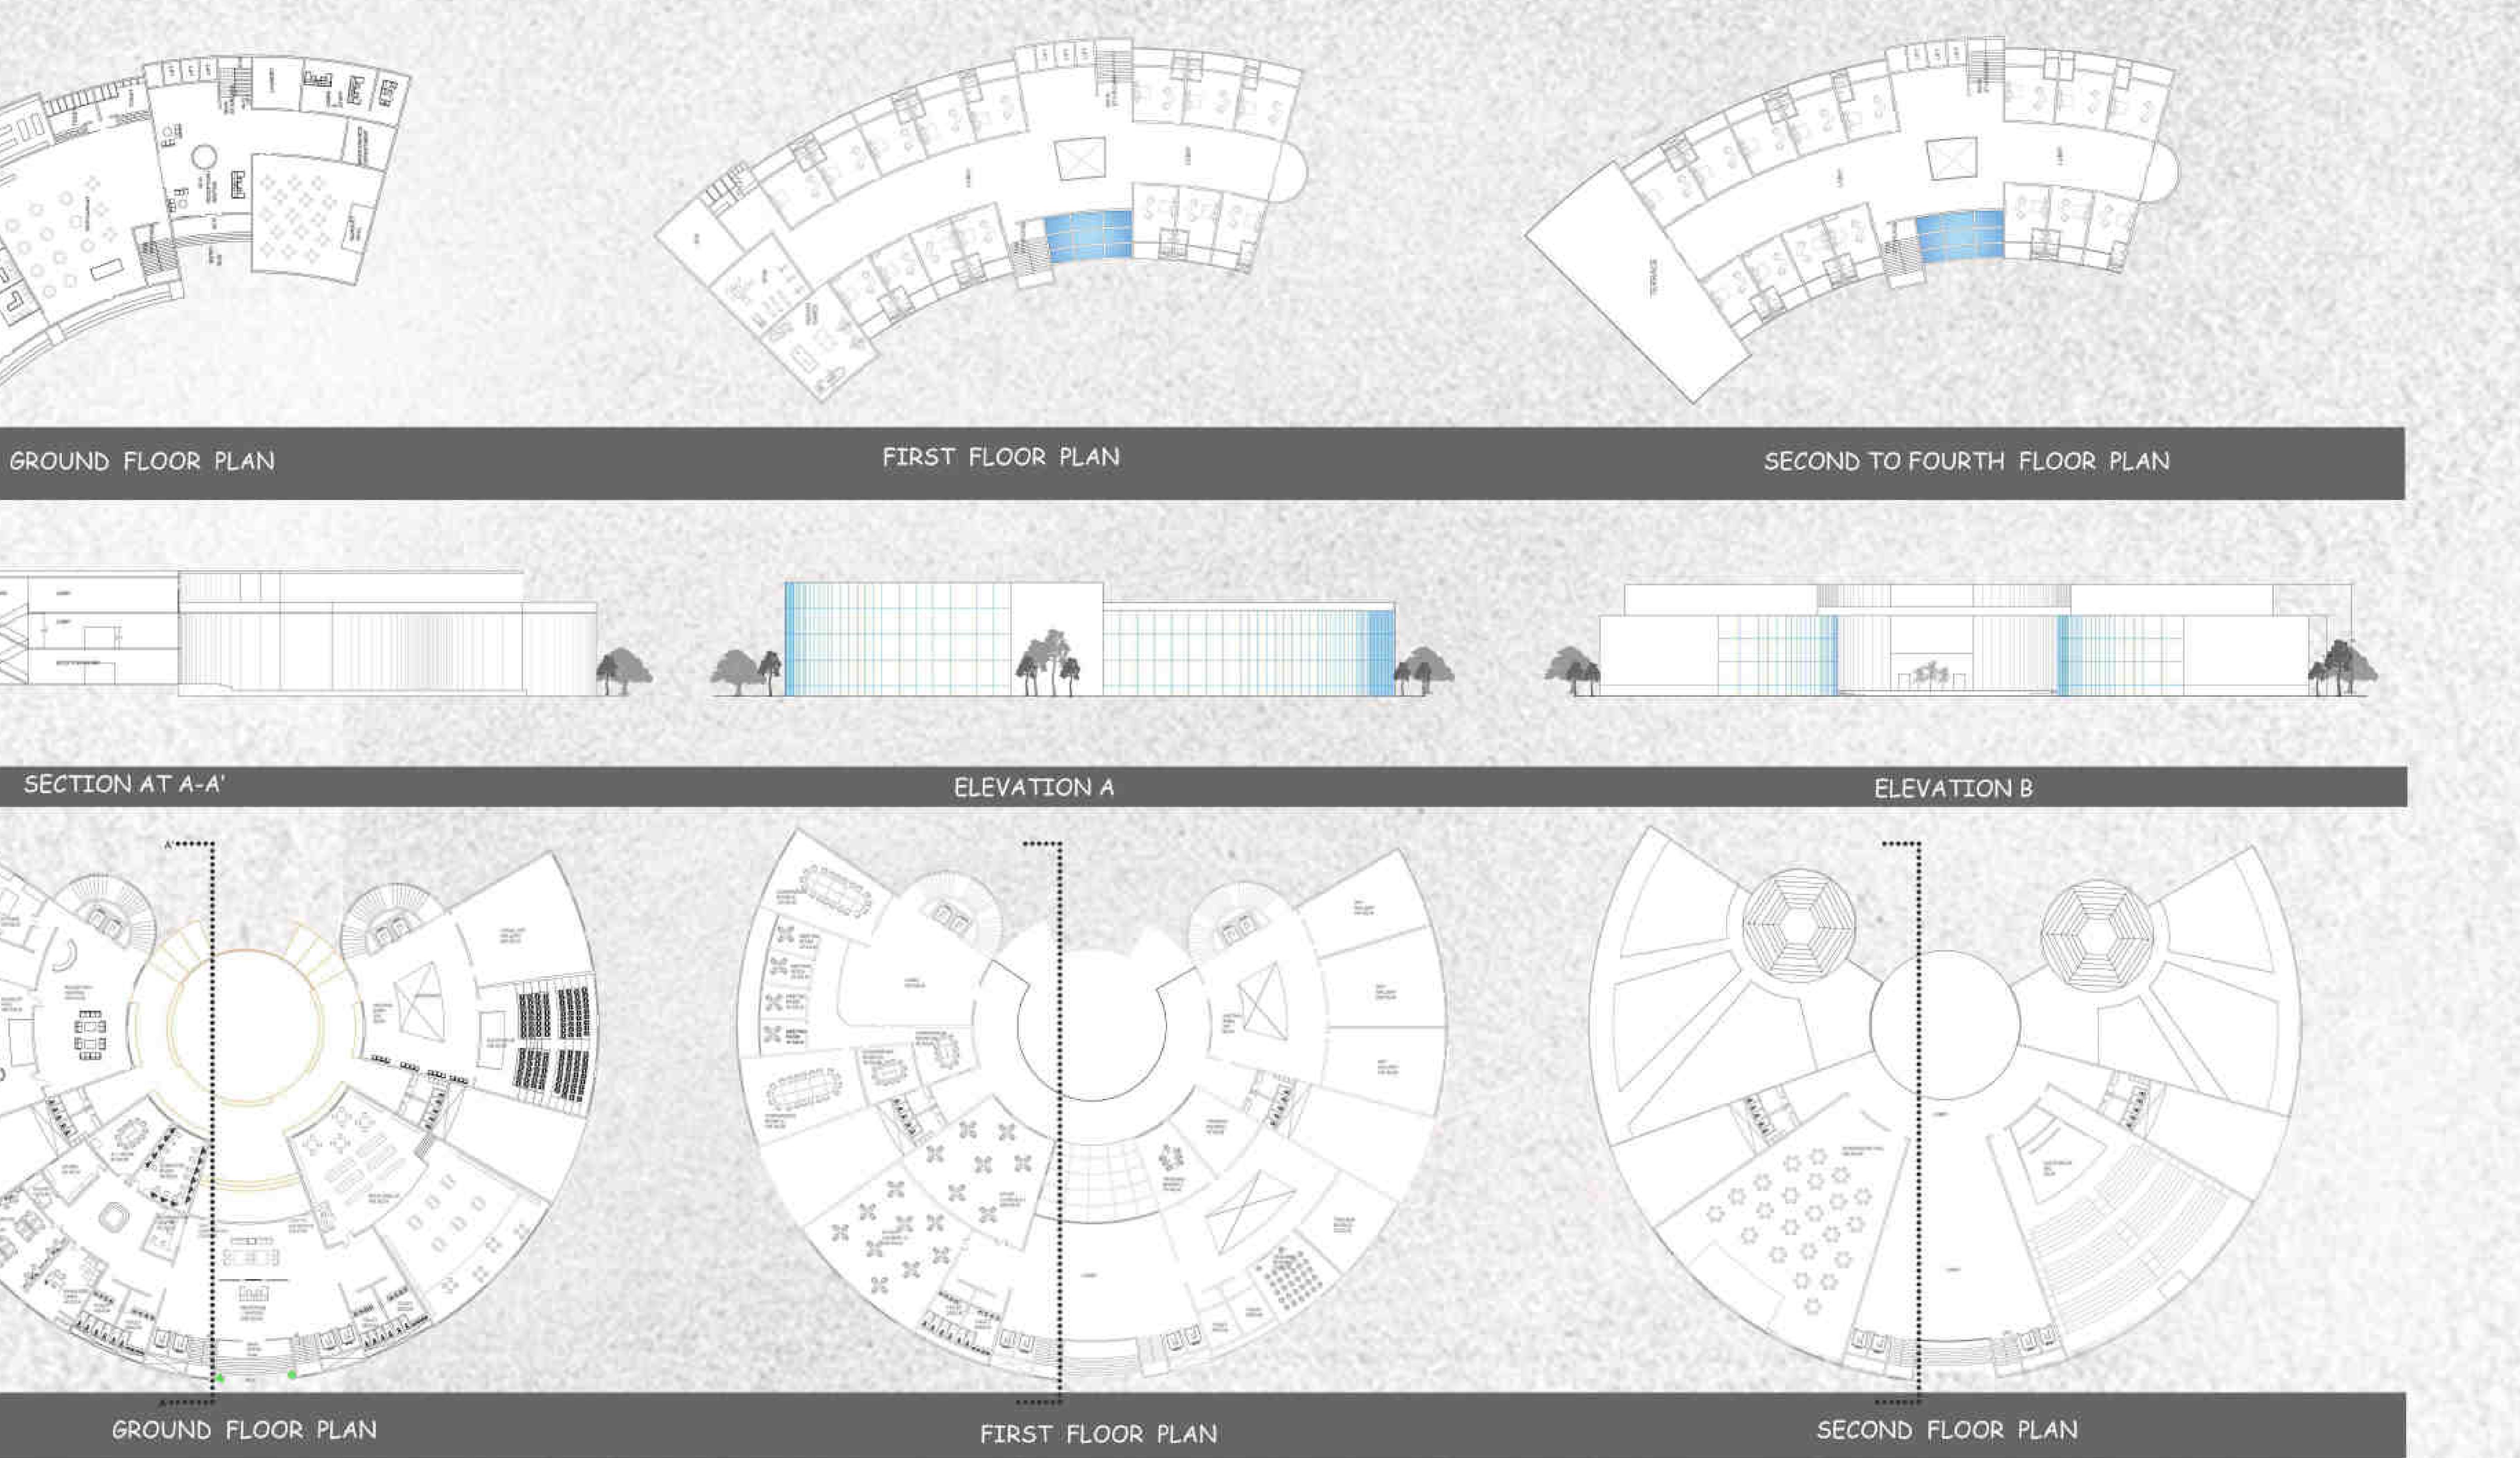

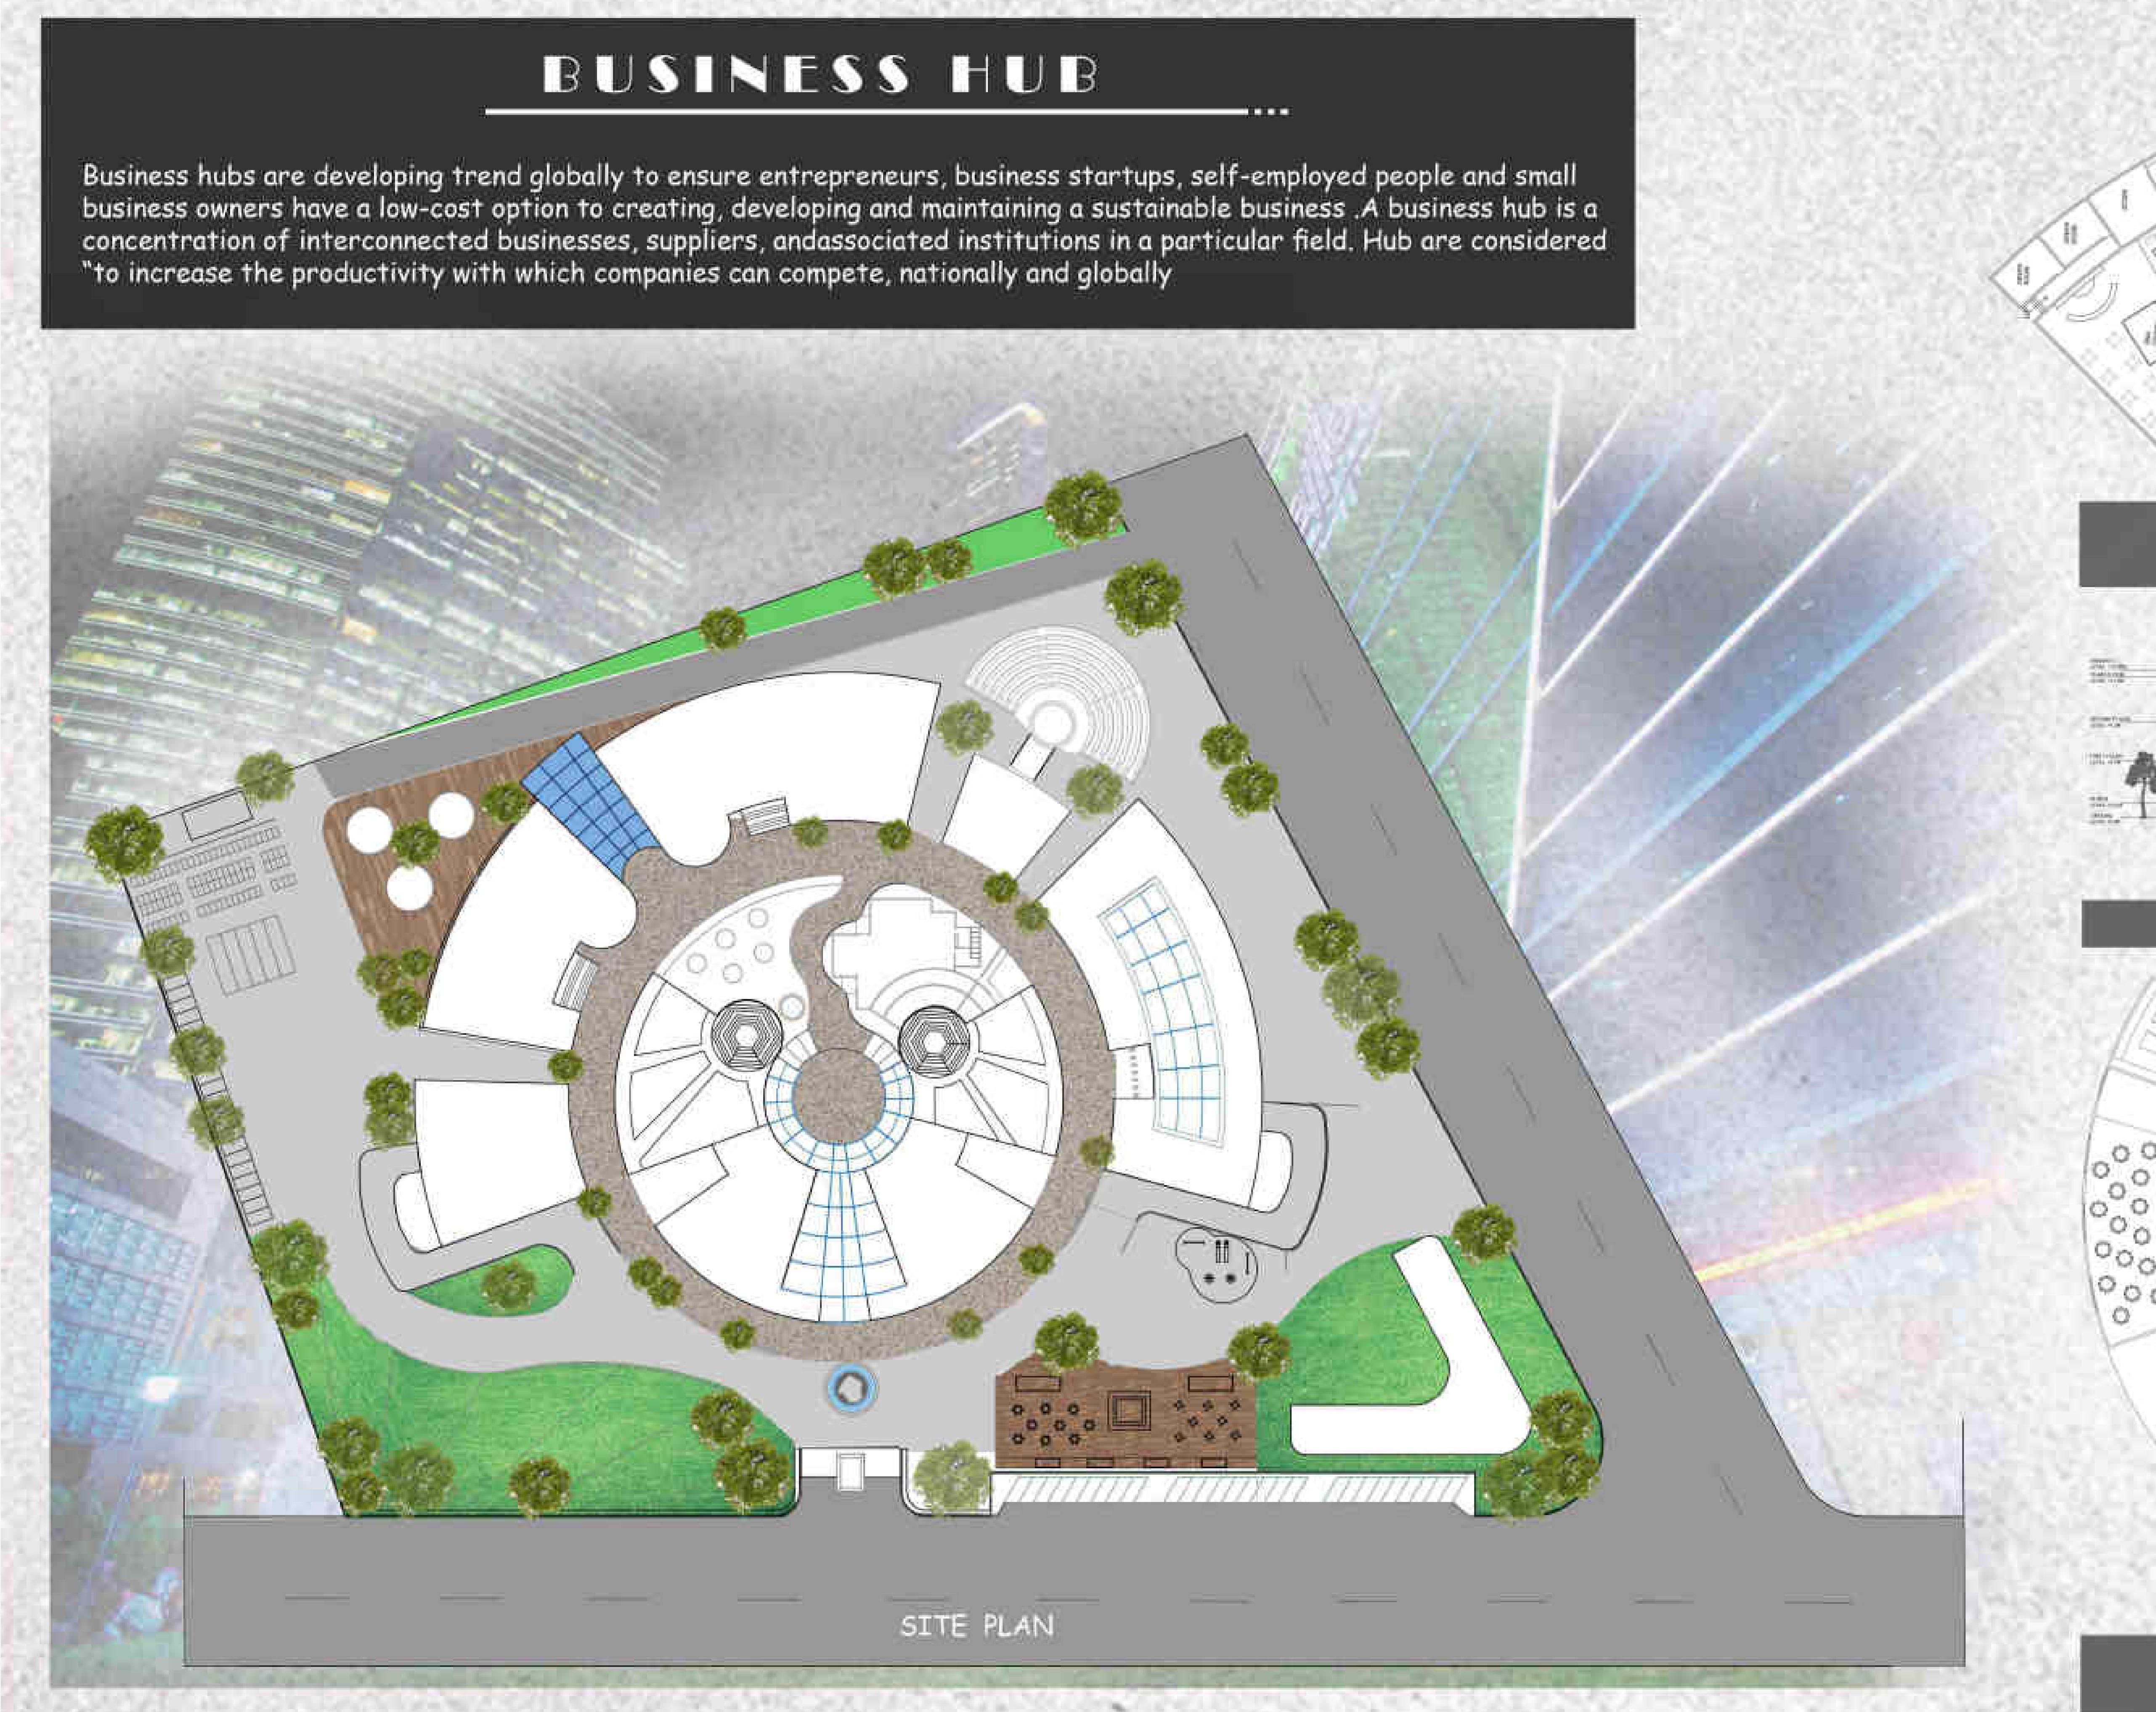

Housing is the modern concept includes not only the 'Physical Structure' for providing protection and shelter but also includes the immediate surrounding and related community services and facilities. Housing is constructed for family life where a person gets physical and mental peace. World Health Organization [WHO] refers the term "Residential Environment" where family can develop and flourish physically, mentally and socially and it includes all necessary services, facilities and equipment and devices needed for physical and mental health and social well-being. It helps in promoting social relationships and community development

THESIS : **E**CO - **R**ESORT

ECO-RESORT

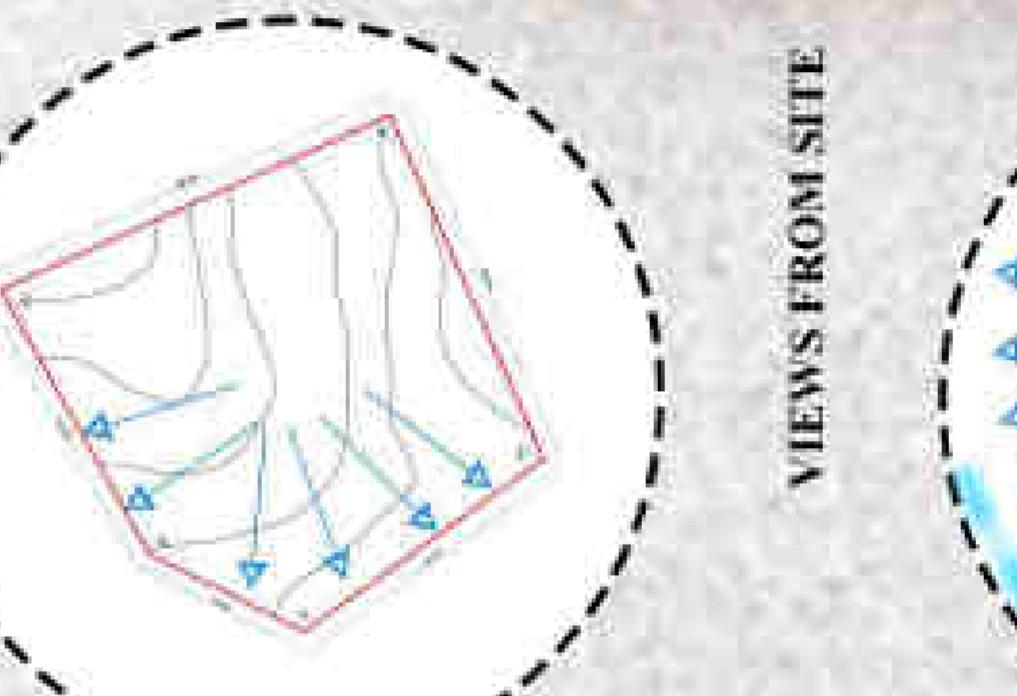

The Eco resort means it is built with local or recycled materials in a design that conforms to environment and harmonizes perfectly with the nature and cultural background of the place, relying on alternative energy.

An Eco-resort encourages the recycle of wastes and sewage water after treatment.

It is a space where human beings live with other creatures such as plants, birds and animals in an integrated, homogeneous and balanced manner.

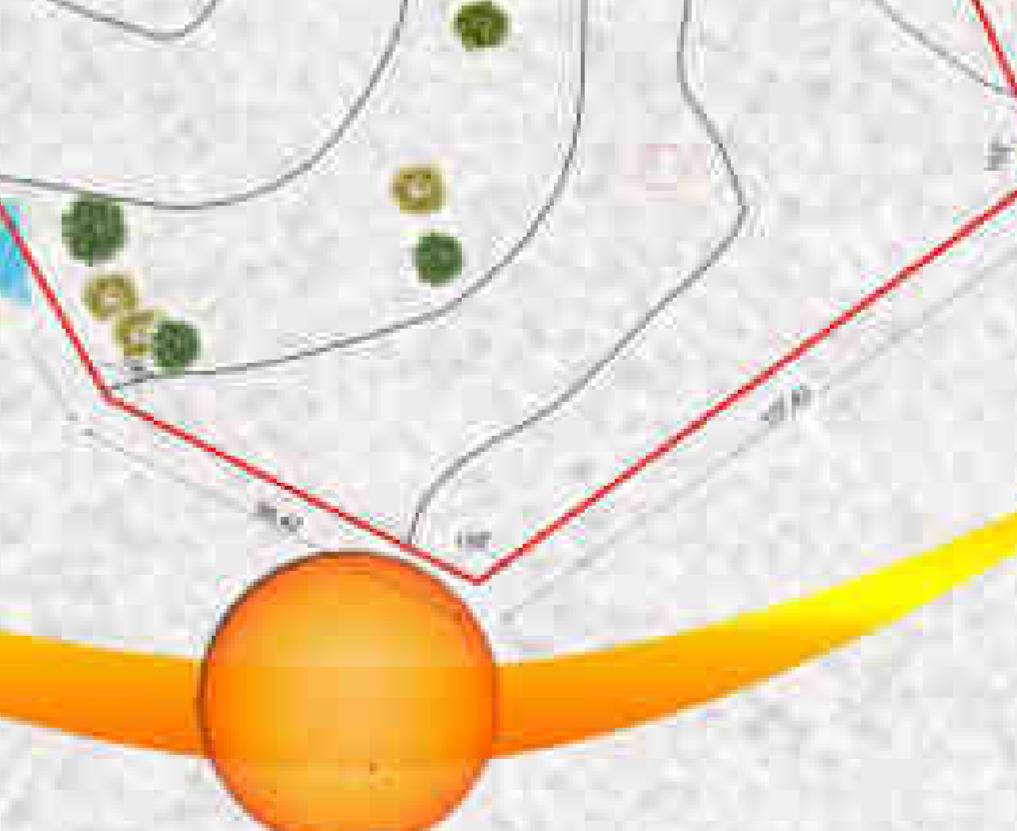

It is accommodation that has made important environmental improvements to its structure in order to minimize its impact on the environment.

Eco resorts are mostly presented because of their locations, often in jungles, and their design inspired by the use of traditional building methods applied with the skilled local craftsman in areas.

TOTAL SITE AREA
35,200SQM
ACRE - 8.7

SITE ANALYSIS

Site has a very good climatic conditions throughout the year like another hill station. During the rainy season best scene can enjoy from the site.

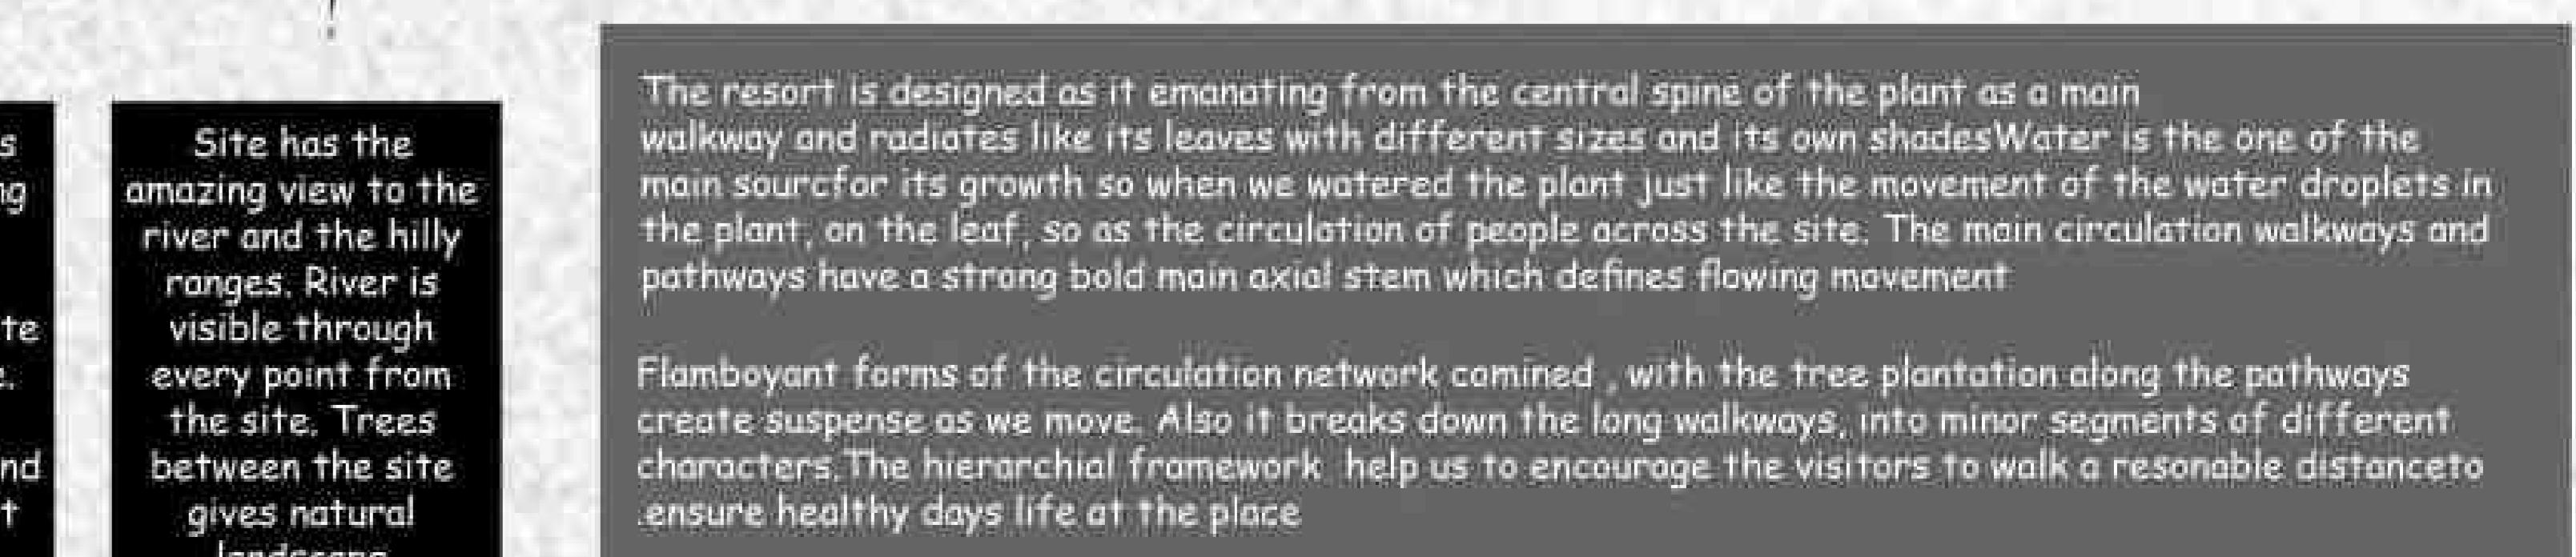

Topola is located near to the Mahabaleshwar. It is situated away from the crowded areas, so its location would be perfect for the Eco Resort.

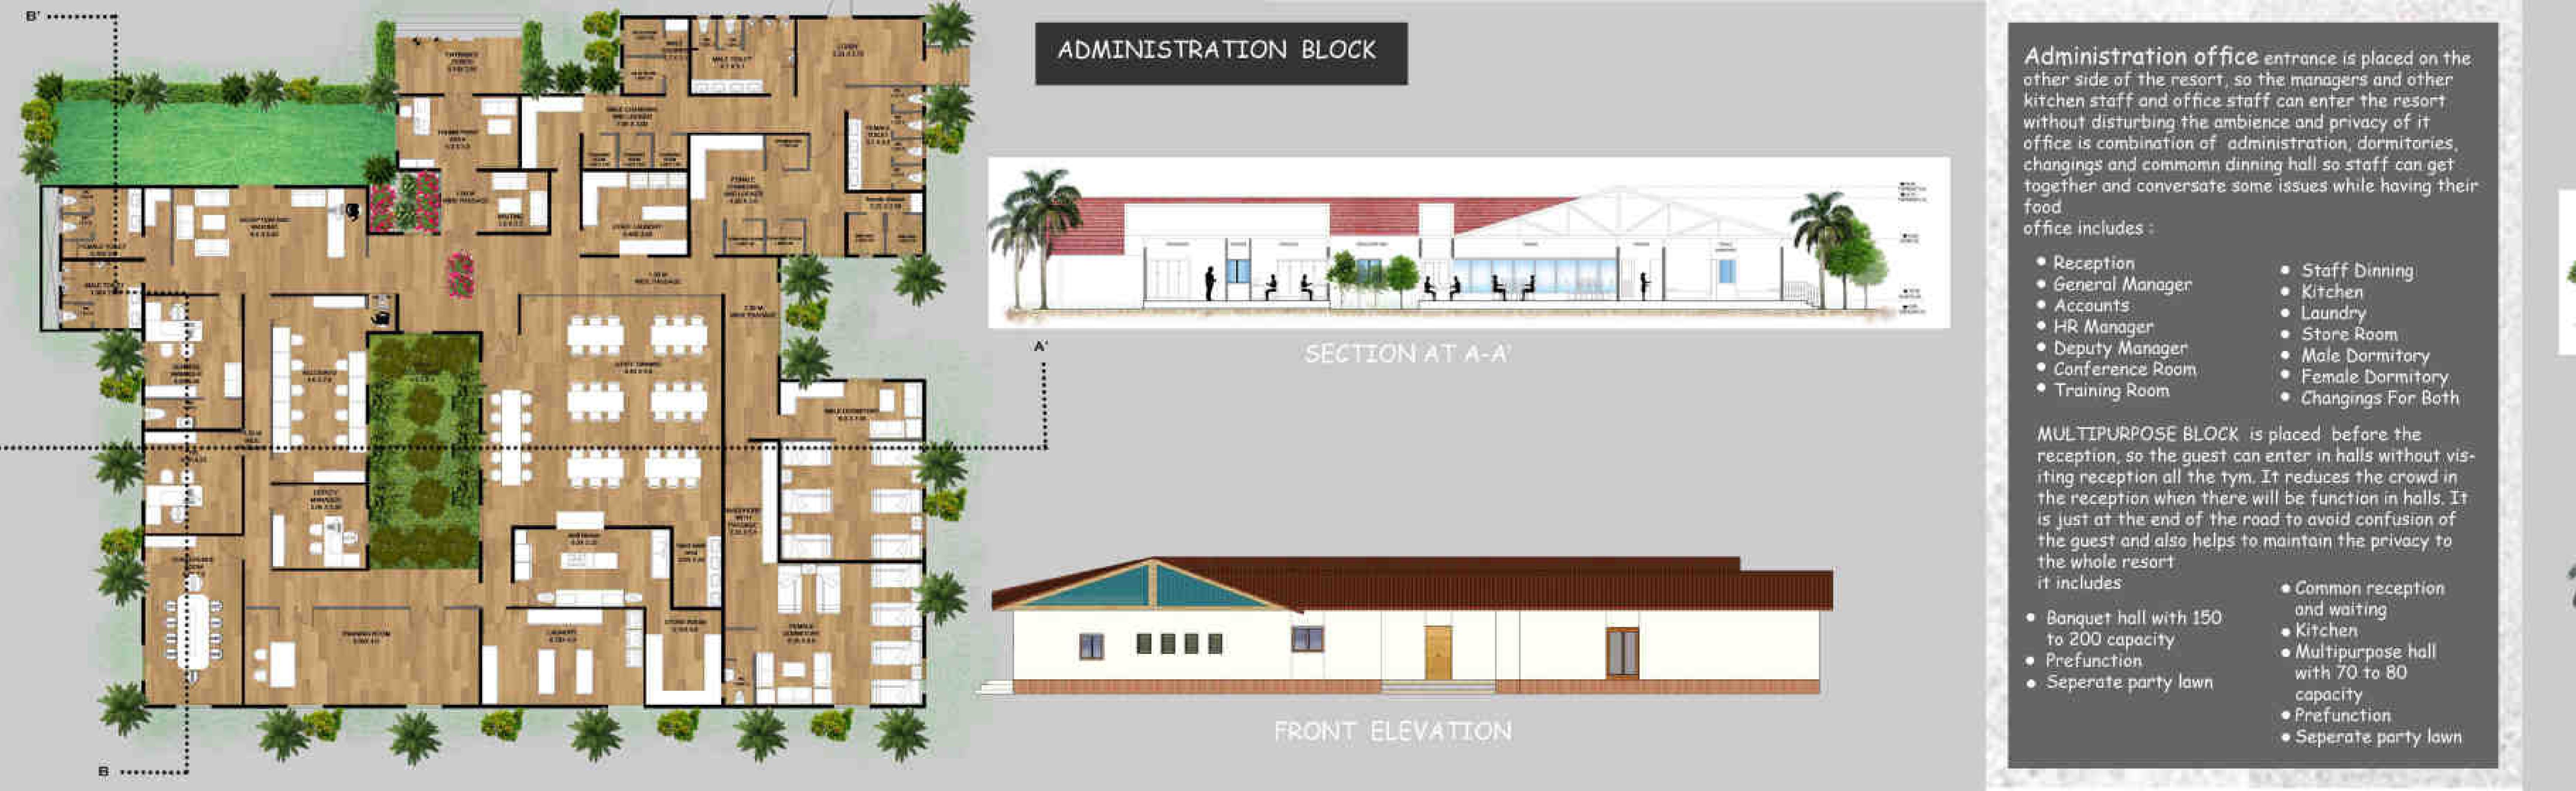

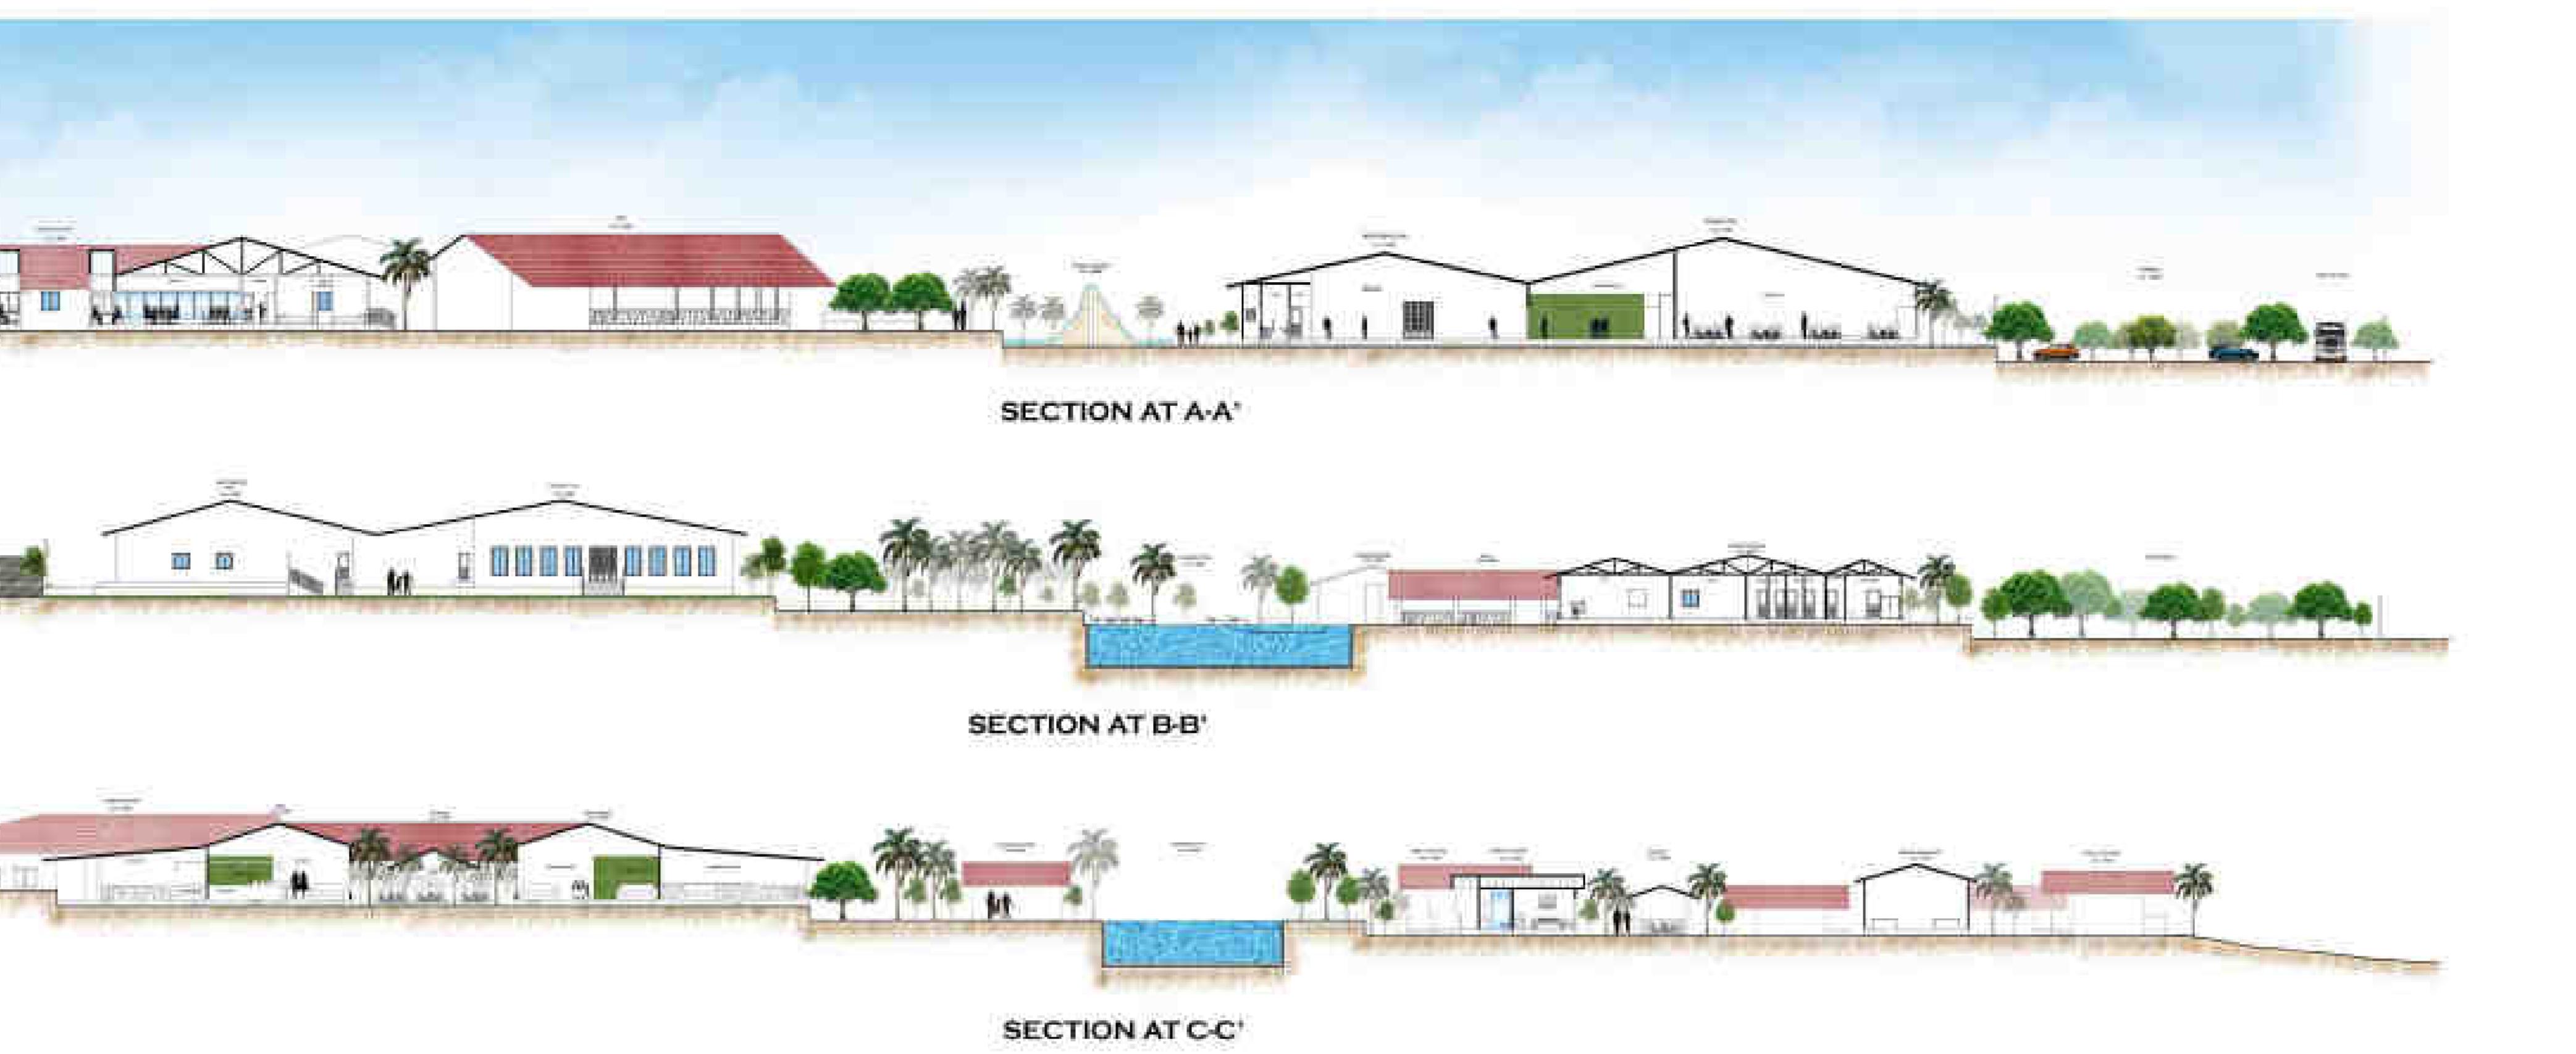

Site has terraces having slope facing east-west direction. The terraces on the site beautify the site. Farming is done across the slope and is one of the best methods.

The resort is designed as it emanating from the central spine of the plant as a main walkway and radiates like its leaves with different sizes and its own shades. Water is the one of the main source for its growth so when we watered the plant just like the movement of the water droplets on the leaf, so as the circulation of people across the site. The main circulation walkways and pathways have a strong bold main axial stem which defines flowing movement.

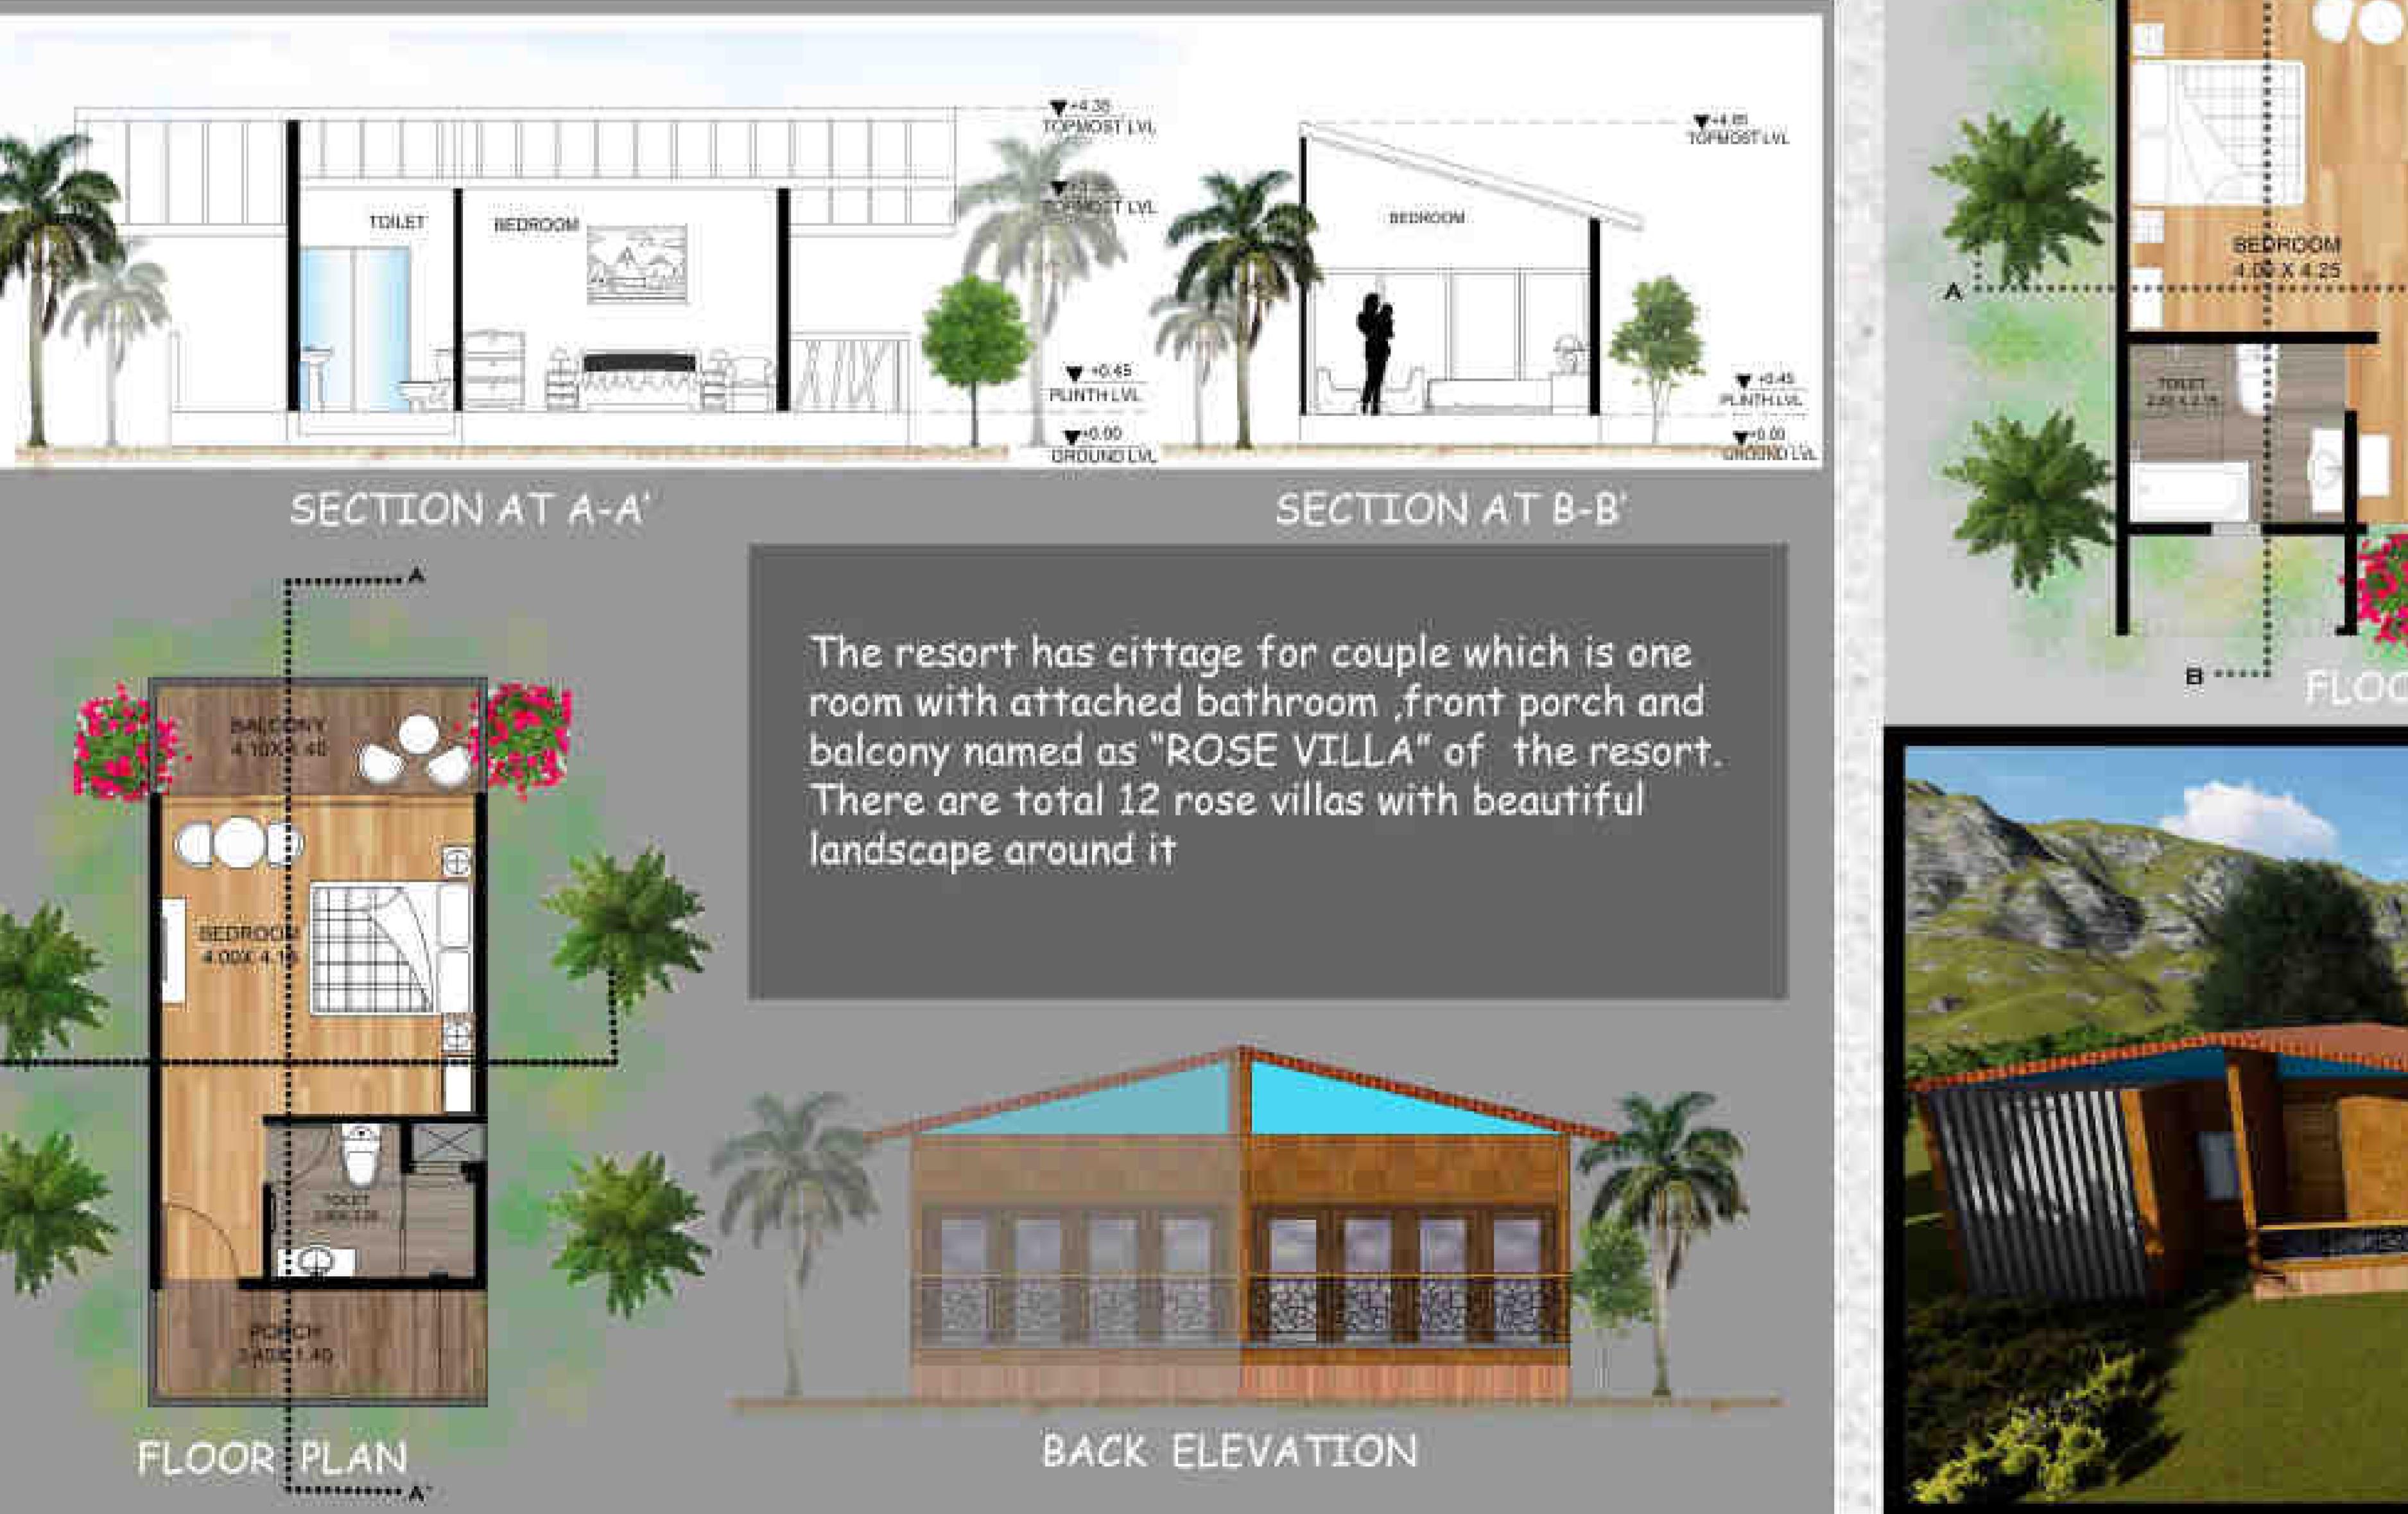

Flamboyant forms of the circulation network coming with the tree plantation along the pathways create suspense as we move. Also it breaks down the long walkways, into minor segments of different characters. The hierarchical framework help us to encourage the visitors to walk a resonable distance to ensure healthy days life at the place.

CONCEPT

villa is named as "BOUGANVILLA" which has two master bedrooms with one toilet. It also has front porch and balcony. Villas has private lawn in the back-yard which is surrounded by locally found flowering trees and specially bougainvillea trees. There are total 9 bouganvillas which placed at the corner of the site for the privacy, additionally villa has great mountain view from he balcony

Third villa is "LOTUS VILLA" which has spacious ground and upper floor with privatefacilties. It is specially designed for family and placed at the end of the resort. There are 5 Villas. Villa has amazing valley and mountain view ground floor
